TESZ	Potsdam	November 2-5
SVEKALAPKO	Lammi (Finland)	November 27-30
URALIDES	Moscow	November 29-December 2

The **European Science Foundation (ESF)** acts as a catalyst for the development of sciences by bringing together leading scientists and funding agencies to debate, plan and implement pan-European scientific and science policy initiatives.

The ESF is an association of more than 60 major national funding agencies devoted to basic scientific research in 21 countries. It represents all scientific disciplines: physical and engineering sciences, life and environmental sciences, medical sciences, humanities and social sciences. The Foundation assists its Member Organisations in two main ways: by bringing scientists together in its science programmes, networks and European research conferences, to work on topics of common concern; and through the joint study of issues of strategic importance in European science policy.

It maintains close relations with other scientific institutions within and outside Europe. By its activities, the ESF adds value by cooperation and coordination across national frontiers and endeavours, offers expert scientific advice on strategic issues, and provides the European forum for fundamental science.
