TIMPEBAR	Celle, Germany	Oct. 10-11
SVEKALAPKO	St. Petersburg, Russia	November
EUG 10	Strasbourg, France	Mar.28-Apr.1, 99

Publications

Don't forget to keep the EUROPROBE secretariat informed about your EUROPROBE publications. When manuscripts are accepted for publication, contact us for a EUROPROBE number. And do send a reprint when they are available.

How do we define a EUROPROBE publication? There can be many ingredients but, the most important involve direct connection with EUROPROBE workshops, where research has been defined and promoted by discussion and interaction with people in other disciplines. Included, of course, is all work that has resulted from research applications that specify EUROPROBE collaboration.

MOSCOW EUROPROBE CENTRE

EUROPROBE has an office in Moscow. Dr. Nadja Timofeeva is taking care of EUROPROBE logistics in Russia, including help for visitors from the west (airport, hotel accommodation, domestic travel etc.). The office is located at

MEC-GEON
Chisty per. 4

The **European Science Foundation** (ESF) acts as a catalyst for the development of sciences by bringing together leading scientists and funding agencies to debate, plan and implement pan-European scientific and science policy initiatives.

The ESF is an association of more than 60 major national funding agencies devoted to basic scientific research in 21 countries. It represents all scientific disciplines: physical and engineering sciences, life and environmental sciences, medical sciences, humanities and social sciences. The Foundation assists its Member Organisations in two main ways: by bringing scientists together in its science programmes, networks and European research conferences, to work on topics of common concern; and through the joint study of issues of strategic importance in European science policy.

It maintains close relations with other scientific institutions within and outside Europe. By its activities, the ESF adds value by cooperation and coordination across national frontiers and endeavours, offers expert scientific advice on strategic issues, and provides the European forum for fundamental science.
